

TAKE AIM AT YOUR TOUGHEST FOAMING PROBLEMS

with Surtech® Antifoaming Agents

Surtech high efficiency modified silicones effectively handle your toughest foaming problems

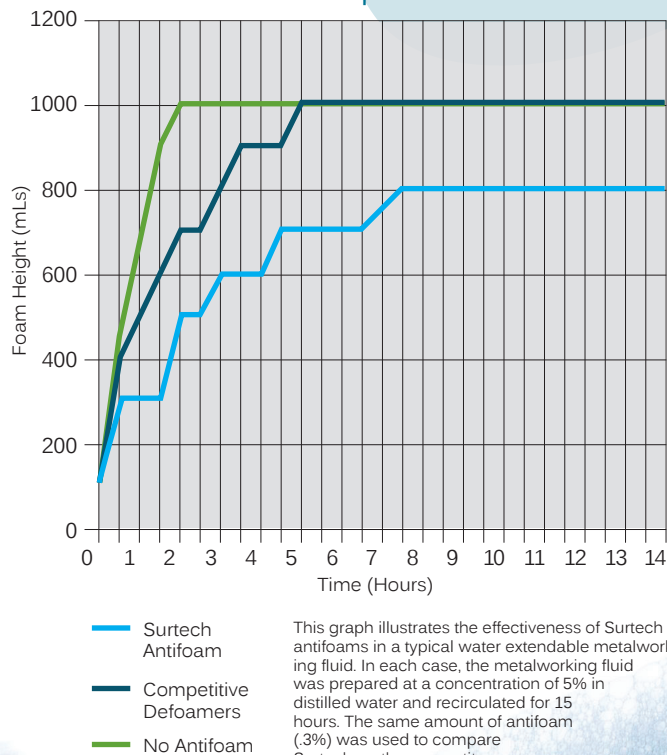

Regardless of your metalworking or hydraulic fluid formulation, PMC Crystal has a Surtech antifoaming agent that will combat foam and protect valuable equipment.

Surtech high-performance antifoaming agents take aim and kill foam without reacting to your fluid. They will not cause sediment and gelatinous surface agglomeration that can clog filters and block lines.

Lab tested and real world proven, they are more effective than competitive defoamers on the market today.* **Take the Surtech challenge** and see for yourself. Send us a sample of your fluid (without defoamer added) along with a sample of your fluid (with defoamer) for a free foam control study. You'll be surprised by the results.

Enhance the performance of your fluids by winning the battle with foam – use Surtech® Antifoaming Agents.

Surtech vs. Competitive Defoamers

High Standards High Performance

The high performance antifoams that provide the benefits you need:

- **Long Term Effectiveness**
Remains effective over a longer period of time
- **No Agglomeration**
Will not clog filters or block lines
- **Easy Dispersion**
Concentrate quality is not compromised

pmc crystal™

About PMC Crystal

PMC Crystal is a performance chemicals company serving a wide range of industries. From waxes, rubber and plastics, processing aids and surface lubricants, wax emulsions, sodium and potassium soaps, cable filling compounds, to high performance antifoaming agents, Crystal is an industry leader. In addition, PMC Crystal offers a wide range of custom manufacturing services. Crystal's commitment to quality and total technical support sets it apart from the rest, and provides products and services that exceed customer requirements and expectations.
